

# Syncnan Artistry Video Wall Solution

# Synclan, a brand of Truknox is a Digital Signage Software for Creative Video Walls.

## what is synclan

SYNCLAN (synchronization+clan+lan) is the next-generation Digital Signage software solution paving its path to change the traditional concept of video walls, which is not only easy to use but also powerful and configurable enough to drive unlimited visual options with high resolution content.

SYNCLAN is a Pixel Perfect synchronization software application among many media client players, where each client plays the video/image file or shows captured-live-content as per

instructions within a frame accuracy on any Asymmetrical or Traditional Video Wall(s) using any type or a combination of displays (LCD, Projectors or LED screen).

Unlike standard Video Walls, SynClan does not bound to any resolution or any fixed ratio; its upto the creative imagination of the user to play with unlimited screens in unlimited configurations, positions and orientations. Synclan lets you unleash your creativity and gives you the freedom to build video walls on a new scale – it opens up opportunities to not only to communicate with larger numbers of viewers, but also to heighten the dramatic impact of your message.
